INTRODUCTION

Originally, this booklet was developed to augment the series of maps entitled Maine Land in State and Federal Conservation Ownership, compiled in March, 1989 for The Land for Maine's Future Board by Richard D. Kelly Jr. of the Maine State Planning Office. This second edition is provided for the same purpose; a revision and reprinting of the maps now titled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. The purpose of the booklet is to provide a listing of the lands appearing on the maps in a convenient form, as well as provide information concerning some of the agencies and organizations that hold land in Maine for conservation and/or recreation in the State of Maine. Recognition of the contribution of the Land for Maine's Future Board in the conservation of Maine land is another primary purpose.

The compilation of these maps grew out of the fact that the Land for Maine's Future Board, empowered to acquire conservation and/or recreation land by Maine voters through a \$35 million bond passed in November, 1987, had no one single source, or map, that illustrated all of the current public conservation holdings, to aid them in their legislatively-mandated "needs assessment" process. As one of the criteria for the future purchase of land was proximity to existing holdings, it was decided to map all State and Federal conservation ownership, and/or recreation land on one set of maps at a usable and convenient scale.

The scale selected to map the properties was 1:250,000, or one inch equals four miles. This scale is small enough to cover the whole state with a reasonable number of sheets, and large enough to delineate actual property boundaries in most instances. These 1:250,000 scale maps correspond to the series of maps of the same scale published by the United States Geological Survey (USGS). The quadrangle names used by the USGS have been retained on the property maps.

The properties delineated on these maps represent Federal, State, selected Municipal, and Non-profit Lands held for conservation and/or recreation. The one exception is the lighthouse category owned by the United States Coast Guard. The lighthouses shown on the maps serve their intended function as aids to navigation, but are also perceived as being of scenic, historic, and architectural significance. Many of Maine's lighthouses have been listed on the National Register of Historic Places.

Of the approximate 1,380 islands, ledges, and rocks held by the Maine Bureau of Public Lands, only those islands one acre in size and over are delineated on the maps. This cut-off point was used for mapping purposes only, in order to keep the maps simple and uncluttered. The cut-off point also had the added effect of eliminating from the maps a multitude of rocks and ledges, many of which are possibly under water at high tide.

Those properties too small to be mapped at this scale are delineated with a circle filled with the appropriate color. In these instances, the circle covers an area larger than the property itself. Each category of ownership is numbered on the maps separately and consecutively from west to east and from south to north by quadrangle.

All Federal and State highways and roads are shown on these maps only to illustrate the transportation network. To locate a particular highway or road by route number, a road map should be used in conjunction with these maps.

These maps represent an inventory of Maine land in Federal, State, selected Municipal, and Non-profit conservation ownership, but do not intend to represent the legal boundaries of these properties. For further information concerning any specific property shown on these maps, contact the appropriate agency or organization.

FEDERAL LANDS

Federal agencies holding title to conservation land in Maine are: U.S. Department of the Interior (National Park Service), U. S. Fish and Wildlife Service, U. S. Coast Guard, U. S. Air Force, and the U. S. Forest Service.

List of lands administered by Federal Agencies in the State of Maine and delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. Numbers refer to the parcel numbers on the maps. (name of owner in parentheses)

MAINE BUREAU OF PUBLIC LANDS
Thomas Morrison, Director

Central Office: AMHI - Harlow Building, Augusta, Maine
Telephone: (207) 287-3061
Mail Address: Statehouse Station 22, Augusta, Maine 04333

Established: October, 1973

Organizational Units: Operations, Planning, and Financial Management

The origin of Maine's Public Reserved Lands spans a period of nearly 300 years, dating to the early Proprietors' grants from Colonial Massachusetts. However, it wasn't until the conclusion of the Revolutionary War that the tradition became firmly established. At this time, Massachusetts began disposing of its public domain lands in its northern territory (later the State of Maine), as a means to pay outstanding war debts and to encourage settlement. Initially, four 320-acre tracts, popularly known as Public Lots, were reserved from the sale of each township. They were designated for the following purposes: one for the school, one for the first settled minister, one for the benefit of the ministry, and one for the support of the General Court of Massachusetts, or Legislature. Whether to gain revenue or encourage settlement, the land sales accomplished little more than the disposal of

the public domain. More frequently than not, the land sold for less than one dollar an acre, indeed, as low as 12 cents an acre for William Bingham's historic purchase, beginning in 1793, of one million acres along the Kennebec River, and one million acres east of the Penobscot River. Because of the harsh landscape and unforgiving climate, very little settlement actually occurred.

From 1783 to 1820, Massachusetts sold more than 6.7 million acres of the public domain. Earlier, an additional 3.7 million acres had been disposed of by the Plymouth Council, a colonial entity which existed under the authority of Charles I of England during the early 17th century.

In 1820, Maine became a State, and so began a 33-year period during which the remaining public domain was administered jointly by Maine and Massachusetts. During this time, joint sales of public domain lands amounted to 1.7 million acres. This brief period is marked by two significant events:

- 1) The Articles of Separation constitute the agreement by which Massachusetts consented to Maine's entry into the Union in 1820. These articles, subsequently incorporated into the State Constitution of Maine, established the Public Reserved Lands as a legal Trust, which could be diminished only by a Constitutional process. Thus, the Public Reserved Lands achieved a special and more permanent status, distinct from other land administered by the State.
- 2) In 1832, the two States agreed to limit the reservation from the sale of townships to 1,000 acres. They also removed the religious and political provisions from the reservations, dedicating all income from these lands for school purposes. Although the significance of this action was not realized for more than a century, it subsequently provided at least a portion of the justification for later (1973) expanding the stated purpose of these lands as simply to "public use."

The year 1853 marked both the end of Massachusetts' interest in Maine and the end of the Public Domain. By 1878, having sold 3.5 million acres of public domain land on its own, Maine had at last exhausted the public domain, all but two small parcels: 1,053 acres in Sheridan (now Ashland) and 275 acres in New Sweden, both of which remain today. More important, however, it was during this period (1850) that the State of Maine initiated the sale of timber and grass rights on the Public Reserved Lands as a means of protecting this public resource from unauthorized timber harvesting. Although it was later ruled (*Cushing v. State of Maine*, 1981) that the rights were sold only on the timber standing at the time of sale, the transactions were generally interpreted as being of indefinite duration; and the Public Reserved Lands all but disappeared into the fabric of surrounding private ownership.

With renewed interest in public lands issues in the early 1970s, the Bureau of Public Lands was created in 1973. It was charged

with the administration of the Public Reserved Lands, a mandate which included (1) management of the 68,000 acres of Public Lots to which the State still held exclusive title, (2) recapture of the outstanding timber and grass rights of approximately 320,000 acres, and (3) consolidation of the many scattered parcels into larger manageable units. Consolidation was designed to increase the efficiency of administration and create a landbase which would serve broad public purposes. This was an especially important issue because, until this time, the Public Lots had been local assets, held in trust by the State for the eventual benefit of plantations and towns. With its new resolve (based largely on an opinion of the Justices of the Supreme Judicial Court), the State determined that these lands would become State assets, consolidated to enhance the quality of management, administered for the general benefit of all the people.

Many of the goals of the Maine Bureau of Public Lands have been accomplished, with the result that today the Bureau owns 456,068 acres of Maine land. Included within that figure are 655 coastal islands of one acre in size or larger. Not included in that figure are unlocated and located public lands that the Bureau holds in common and undivided ownership with private landowners.

List of lands administered by the Maine Bureau of Public Lands and delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. Numbers refer to the parcel numbers on the maps.

MAINE BUREAU OF PARKS AND RECREATION

Herbert Hartman, Director

Central Office: AMHI - Harlow Building, Augusta, Maine

Telephone: (207) 287-3821

Mail Address: State House Station 22, Augusta, Maine 04330

Established: April 5, 1935

Organizational Units: Division of Operations and Maintenance, Boating Facilities Division, Maine Rivers Program, Division of Planning and Research, Off-Road Vehicle Division.

The Bureau of Parks and Recreation originated in 1935 with the establishment of a State Park Commission consisting of five members, including the Commissioner of Inland Fisheries and Game (now Wildlife) and the Forest Commissioner, ex officio, and three citizen members appointed by the Governor with the advice and consent of the Council. The Commission was renamed the Maine State Park and Recreation Commission in 1963 to meet federal requirements for U.S. Bureau of Outdoor Recreation funds. Administration of the Allagash Wilderness Waterway was assigned to the Commission in 1965. In 1971, the Commission was abolished and its duties assumed by a new Parks and Recreation Department which, in the state government reorganization of 1973, became the Bureau of Parks and Recreation within the Department of Conservation. The acquisition and development units were expanded and elevated to a departmental level division of Real Property Management, effective July 1, 1984.

The Bureau of Parks and Recreation was established to administer programs to acquire, design, construct, operate, and maintain areas for public enjoyment and recreation. The primary responsibilities of the Bureau are to acquire, develop, and manage State parks and historic sites; to study and report to the Governor the need for such facilities; to provide information and trails for snowmobiles and all-terrain vehicles; to preserve protect, develop, and manage the Allagash Wilderness Waterway; to provide and manage public facilities for boats; to mark the waters of the State for hazards or remove the same; and to manage the Penobscot Corridor.

At present the Bureau owns, or holds easements, on 91,403 acres of land for the public enjoyment and recreation of the people of Maine.

List of lands administered by the Maine Bureau of Parks and Recreation and delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. Numbers refer to the parcel numbers on the maps.

MAINE BUREAU OF FORESTRY (aka Maine Forest Service)
Susan Bell, Director

Central Office: AMHI - Harlow Building, Augusta, Maine
Telephone: (207) 287-2791
Mail Address: State House Station 22, Augusta, Maine 04333

Established: 1891

Organizational Units: Division of Forest Management and Utilization, Division of Forest Fire Control, and Division of Insect and Disease Management.

The Bureau of Forestry (aka Maine Forest Service) originated in 1824 with the appointment of a Land Agent, who in 1891, was also designated Forest Commissioner. The Land Agent title was abolished in 1923 and the Agent's duties were assigned to the Forest Commissioner. In 1965, the Bureau had evolved under the Commissioner and was statutorily recognized as the Forestry Department. The State Government reorganization legislation of 1973 renamed the Department as the Bureau of Forestry within the newly-created Department of Conservation, and designated the Forest Commissioner as the Director of the Bureau of Forestry.

The Bureau is divided into three functional divisions, which are listed above under Organizational Units. Each division is administered by a chief executive officer, who is in charge of all divisional activities. Field operations are administered through functional regional supervisors.

The Bureau was established to ensure, for present and future generations of Maine citizens, the greatest economic and social benefits from the trees and the forest lands of the State. The primary responsibilities of the Bureau are: to encourage and promote appropriate forest land management practices on public and private lands; to provide advice and assistance in forest management to woodland owners; to produce, distribute, and plant forest seedlings; to promote improved markets, utilization, and manufacture of forest products; to initiate and maintain up-to-date economic data; to promote productivity and current use as the basis for forest land taxation; to encourage long-term forest management objectives; to protect the forest resource from fire, insects, diseases, and other natural enemies; to encourage and promote the planting, care and protection of shade trees, shrubs, and forest growth by individuals, municipalities, and State agencies; to maintain and improve the scenic beauty, wildlife habitat, and recreational values of Maine; to determine, encourage, and conduct needed research in forest resource and shade tree management; and to develop through information, education, and formal publications a greater public awareness

and appreciation of forests as Maine's basic economic and renewable resource, of the need to protect the forest resource, and of the economic and social benefits to be derived from multiple use of forest lands.

Although not one of the large landholding State agencies, Bureau of Forestry lands (553 acres) are represented upon these maps because of the Bureau's role as a conservation and forest management agency.

List of lands administered by the Maine Bureau of Forestry (aka Maine Forest Service), under the category of Miscellaneous Public Lands, and delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. Numbers refer to the parcel numbers on the maps.

MAINE DEPARTMENT OF INLAND FISHERIES AND WILDLIFE
Norman Trask, Acting Commissioner

Central Office: 284 State Street, Augusta, Maine

Telephone: (207) 287-3371

Mail Address: State House Station 41, Augusta, Maine 04333

Established: 1880

Organizational Units: Bureau of Administrative Services, Bureau of Resource Management, Bureau of Warden Service, Division of Information and Education, Division of Planning, Advisory Council (Inland Fisheries and Wildlife), Atlantic Sea Run Salmon Commission, Junior Maine Guides & Trip Leaders Curriculum Board, Advisory Board for the Licensing of Guides.

The Department of Inland Fisheries and Wildlife (formerly Game) traces its origin back to 1830 when wardens were first appointed by the Governor to enforce the moose and deer law enacted that year. Two Commissioners of Fisheries were appointed in 1867. In 1880, the Commissioners were assigned responsibility for enforcing game laws as well as fish laws, and in 1895, their title was changed to Commissioners of Inland Fisheries and Game. The two Commissioners were replaced by the Commissioner of Inland Fisheries and Game in 1917. Functional Divisions were added as the Department mandates and responsibilities were expanded, e.g., first engineer in 1932; flying Warden Service in 1937; Wildlife Division in 1938; Fisheries Division in 1951; Information and Education in 1955; Program Development and Coordination in 1968; Snowmobile Registration in 1969; Realty in 1970; Watercraft Registration and Safety in 1974, which was combined with Snowmobile Registration to form the Division of Recreational Safety and Registration in 1976. Effective October 1, 1975, the Department was renamed the Department of Inland Fisheries and Wildlife.

The Department of Inland Fisheries and Wildlife was established to ensure that all species of wildlife and the aquatic resources in the State of Maine are maintained and perpetuated for their intrinsic and ecological value, for their economic contribution, and for their recreational, scientific, and educational value to the people of the State of Maine. In addition, the Department is responsible for the establishment and enforcement of rules and regulations governing fishing, hunting and trapping, the propagation and stocking of fish, the acquisition of wildlife management areas, the registration of snowmobiles, watercraft, and all-terrain vehicles, safety programs for hunters, snowmobiles, watercraft, and the issuing of licenses and permits for hunting, trapping, fishing, guiding, etc.

At present the Department owns, or holds easements on, 83,719 acres of Wildlife Management Areas for the conservation of Maine's wildlife for future generations of the people of Maine.

List of lands administered by the Maine Department of Inland Fisheries and Wildlife and delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. Numbers refer to the parcel numbers on the maps.

Unless stated otherwise all IF&W properties are Wildlife
Management Areas.

MAINE BOAT LAUNCH SITES

In addition to the lands held by various state agencies for the purpose of conservation and/or recreation in Maine, there are 124 boat launch sites owned by the State of Maine to provide the people of Maine with access to the many streams, rivers, and lakes of Maine. The State of Maine also provides funding to municipalities to develop boat launch sites. The municipally owned sites are not delineated on this set of maps.

List of Maine owned boat launch sites, and the towns in which they are located, administered by the Department of Inland Fisheries and Wildlife, the Bureau of Parks and Recreation, the Bureau of Public Lands, and the Department of Transportation, delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. The numbers refer to the parcel numbers on the maps. (owner in parentheses)

BAXTER STATE PARK AUTHORITY

Susan Bell, Chairperson

Irvin C. Caverly Jr., Director

Central Office: 64 Balsam Drive, Millinocket, Maine 04462

Telephone: (207) 723-5140

Mail Address: 64 Balsam Drive, Millinocket, Maine 04462

Established: 1933

Baxter State Park is the result of a dream of former Governor Percival P. Baxter, who donated the first parcel of land in 1931, and over the years added various parcels until the final acquisition brought the Park to its present size of 202,539 acres. In addition to the various gifts of land, he also left two sizeable trust funds to carry out the operation and maintenance of the Park without the need of State funding. The only exception to this being road maintenance by the Department of Transportation from funds collected through gasoline taxes.

While Baxter State Park bears the name "State", it is separately administered, free from any connection with the larger state park system of the Department of Conservation, Bureau of Parks and Recreation. The Baxter State Park Authority, a three person authority consisting of the Attorney General, the Commissioner of the Department of Inland Fisheries and Wildlife, and the Director of the Bureau of Forestry, has full power in the control and management of the Park and in the exercise of all Trust obligations.

Operation of the Park is financed in part from use fees, entrance fees, etc., but the majority of the funds are obtained from the trusts established by Governor Baxter, namely the original trust established in 1945 and a larger fund established through his will in 1969 administered by the Boston Safe Deposit and Trust Company. Park operations were financed through the State's General Fund until 1971 when they became self-sufficient, as it was felt that the main purpose of Governor Baxter's bequests was to release the State from any obligation for Baxter Park operating costs, except road maintenance.

Responsibility for the operation of Baxter State Park is delegated from the Authority to the Park Director who supervises the managers of the Divisions of Administration, Forestry, and Park Operations.

The Baxter State Park Authority was established to operate and maintain Baxter State Park for the use and enjoyment of the people of Maine in accordance with the wishes of its donor, former Governor Percival P. Baxter, that this park "... shall forever be retained and used for state forest, public park and public recreational purposes ... shall forever be kept and remain in the natural wild state ... shall forever be kept and remain as a sanctuary for beasts and birds."

The primary responsibilities of the Authority are to operate and maintain various campgrounds and campsites within the 202,539 acre wilderness Park; to protect the fauna and flora within the Park for the enjoyment of present and future generations; to receive and expend monies from the trusts and other income for the maintenance and operation of the Park; to acquire additional land for the park as authorized by law; to establish rules and regulations as necessary for the protection and preservation of the Park, monuments, and structures thereon, and for the protection and safety of the public; and to exercise police supervision over the Park.

Baxter State Park is delineated on the Millinocket and Presque Isle Quadrangles of the set of maps entitled Maine Land in Federal State, Municipal, and Non-profit Conservation Ownership. In addition to the 202,539 acre Park, the Baxter State Park Authority holds title to the 250-acre Austin Cary Tree Farm in Harpswell, and the 225-acre Mount Chase State Forest in Mount Chase. These two properties are listed under Miscellaneous Public Lands, numbers 19 and 107 respectively.

| Property | Acreage |
|---------------------------------------|---------|
| Baxter State Park | 202,539 |
| Mount Chase State Forest (misc. #107) | 225 |
| Austin Cary Tree Farm (misc. #19) | 250 |

NON-PROFIT ORGANIZATION LAND

In this section of conservation lands, 35,862 acres of fee land were mapped that is owned by state-wide and local non-profit organizations and land trusts. Easements were not mapped in order to protect the privacy and rights of individual conservation-minded property owners. Of the forty-eight local land trusts that own land in fee that were contacted, 52% responded with information; 4% declined to provide information; and 44% did not respond.

The major landholding non-profit organizations, The Nature Conservancy, Maine Coast Heritage Trust, National Audubon Society, and Maine Audubon Society, all responded positively to having their lands included on the property maps.

The Nature Conservancy (TNC) is a national, non-profit conservation organization which devotes its resources to identifying, protecting, and managing biologically significant natural areas and the variety of life dependent upon them. To date, TNC and its members have been responsible nationally for the preservation of over 5,500,000 acres of forests, marshes, prairies, deserts, mountains, and islands. The Conservancy obtains virtually all its support through private, tax-deductible contributions.

Since its founding in 1956, the Maine Chapter of TNC has protected, or assisted in the protection of, over 90,000 acres of Maine's finest natural lands. In recent years, it has acquired an average of one million dollars worth of property annually. Most lands acquired are retained by the Chapter; some, however, are subsequently transferred to federal, state, municipal, and private agencies in Maine for conservation and recreational purposes.

Maine Coast Heritage Trust (MCHT) is a land conservation organization dedicated to protecting land that is essential to the character of Maine, its coastline and islands in particular. For the past twenty years MCHT has provided conservation services to landowners, local land trusts, federal and state agencies and communities throughout Maine. As a result, more than 42,000 acres have been permanently protected, including 136 entire islands, valuable farmland and unusual coastal headlands.

The National Audubon Society (NAS) has seven chapters in Maine and a membership of approximately 4,000. The society, which has owned land in Maine since the 1920s, currently holds 2,188 acres, including 15 bird sanctuaries, most of which are islands. At the turn of the century the NAS placed some of its wardens on Maine's coast to

protect seabirds. The Society has operated the Hog Island Ecology Camp since the late 1930s. The NAS staff focuses on seabird management and over the last two decades has successfully reintroduced the Common Puffin to Maine.

The roots of the Maine Audubon Society (MAS), a state organization, can be traced to the Portland Society of Natural History, which was founded in 1843. In the 1970s the Portland group merged with the Cumberland County Audubon Society and took the name the Society bears today. MAS seeks its goal of the conservation, and enhancement of Maine's ecosystems through the promotion of individual understanding and action by focusing on advocacy and education. The Society also runs endangered species protection and lake conservation programs for students on the 13 sites it owns, and works with teachers to develop natural history and environmental curricula.

Local Land Trusts play an essential role in Maine's conservation community. Due to shrinking state and government resources, conservation land trusts are often the only alternative for preserving threatened lands. Consequently Maine's land trusts are taking on new responsibilities, and filling a very large gap, generally with limited financial resources and little or no staff.

List of non-profit conservation lands delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. (name of owner in parentheses)

MISCELLANEOUS PUBLIC LANDS

Under this category of public lands, 27,261 acres have been mapped. Lands owned by Baxter State Park Authority (see p. 47), The University of Maine, Maine Department of Transportation, Maine Department of Agriculture Food and Rural Resources, Maine Bureau of Forestry (aka Maine Forest Service) (see p. 35), and several municipalities, are represented in this category.

This category of public lands was included in this edition of the maps because there are many types of public lands that are not owned nor administered by large public agencies. These type of land include fire-towers, scenic overlooks and turnouts, town forests and parks, and experimental forests used for educational purposes. In future editions of this series of maps it is the intention of the compiler to collect more data regarding these type of lands, specifically land owned by towns in Maine.

List of Lands administered by miscellaneous public agencies in the State of Maine and delineated on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. (name of owner in parentheses)

THE LAND FOR MAINE'S FUTURE PROGRAM

In November of 1987, Maine citizens voted overwhelmingly in support of establishing a \$35 million fund for the purchase of significant natural lands for public recreation and conservation. The Land For Maine's Future Board was created to administer the Land For Maines' Future Fund and to provide a public process for the evaluation and selection of lands. Since its inception, the Land For Maine's Future Program has acquired 28 new areas for public use totalling 48,964 acres.

List of properties purchased (fee and easement) through the Land for Maine's Future Program, and delineated in the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership. Properties are listed by their map number and by the agency which holds title to the property.

| Bureau of Public Lands | Acreage |
|-------------------------------|----------------|

Statistical Summary of Maine Land in Conservation which has been mapped on the set of maps entitled Maine Land in Federal, State, Municipal, and Non-profit Conservation Ownership.

| <u>FEDERAL AGENCY</u> | Acreage |
|----------------------------------|----------|
| Department of Agriculture | |
| U.S. Forest Service | 58,100 |
| Department of the Interior | 45 |
| U.S. Fish and Wildlife Service * | 44,440 |
| National Park Service | |
| Acadia National Park | 41,267 |
| Appalachian Trail Corridor | 30,935 |
| Department of Defense | |
| U.S. Air Force | 372 |
| U.S. Navy | 12,180 |
| Department of Transportation | |
| U.S. Coast Guard ** | 296 |
| Veterans Administration | 510 |
| General Services Administration | <u>1</u> |
| Federal Agency Total | 188,146 |

STATE AGENCY

| | |
|---|---------|
| Department of Conservation | |
| Bureau of Public Lands *** | 456,068 |
| Bureau of Parks and Recreation | 91,403 |
| Bureau of Forestry | 553 |
| Department of Inland Fisheries and Wildlife | 83,719 |
| Baxter State Park Authority | 203,014 |
| Department of Transportation | 897 |
| Department of Agriculture, Food and Rural Resources | 306 |

| | |
|-------------------------|--------------|
| University of Maine | <u>4,631</u> |
| State Agency Total **** | 840,591 |

NON-PROFIT ORGANIZATION LAND

| | |
|--------------------------------|------------------|
| The Nature Conservancy | 19,357 |
| Local and Regional Land Trusts | 11,412 |
| National Audubon Society | 2,188 |
| Maine Coast Heritage Trust | 1,300 |
| Maine Audubon Society | 793 |
| Chewonki Foundation | 537 |
| Island Institute | <u>275</u> |
| Non-profit Total | 35,862 |
| Selected Municipal Land | <u>20,389</u> |
| Grand Total | 1,084,988 |

*Total for U. S. Fish & Wildlife Service is from the USF&W Service Annual Report of Sept. 30, 1992.

** Total for U. S. Coast Guard Lighthouses is based upon the best information available from the Maine Coastal Island Registry and the Maine Historic Preservation Commission.

*** Total for Maine Bureau of Public Lands does not include islands, ledges, and rocks under one acre in size totaling perhaps as much as 530 acres. This total also does not include located and unlocated public lots that the Bureau holds in common and undivided ownership with private landowners.

**** State of Maine total does not include State-owned boat launch sites, as many of these are included within the larger parcels.
